Volume 169 1986

Contents

Letters to the Editor

Overluminosity of distant radiogalaxies: Evolution or gravitational amplification?
Hammer, F., Nottale, L., Le fèvre, O. L1

Cosmology

Absorption line systems in QSO spectra: properties derived from observations and from photoionization models
Bergeron, J., Stasińska, G. 1

Extragalactic astronomy

A high resolution hydrogen-line survey of Messier 31. III. H I holes in the interstellar medium
Brinks, E., Bajaja, E. 14

Optical and infrared study of the three quasars OX 169, NRAO 140 and 3C 446
Courvoisier, T.J.-L., Bell-Burnell, J., Blécha, A. 43

The extended [O III] emission around the QSO MR 2251-178
Nørgaard-Nielsen, H.U., Hansen, L., Jørgensen, H.E., Christensen, P.R. 49

Is NGC 1023/1023 A an interacting system?
Capaccioli, M., Lorenz, H., Afanasjev, V.L. 54

VLA and 100-m telescope observations of two giant galaxies: 0634-20 and 3 C 445 (2221-02)
Kronberg, P.P., Wielebinski, R., Graham, D.A. 63

Further galaxies with Wolf-Rayet emission features
Kunth, D., Schild, H. 71

Radio search for the Sunyaev-Zeldovich effect in the vicinity of PHL 957
Andernach, H., Schlickeiser, R., Sholomitski, G.B., Wielebinski, R. 78

Galactic structure and dynamics

CO 1–0 and CS 2–1 observations of the neutral disk around the galactic center
Serabyn, E., Güsten, R., Walmsley, C.M., Wink, J.E., Zylka, R. 85

Stellar clusters and associations

Linear oscillations of isotropic stellar systems. III. A classification of non-radial modes
Sobouti, Y. 95

Spectroscopy of RR Lyrae stars in Baade's Window and in ω Centauri
Gratton, R.G., Tornambè, A., Ortolani, S. 111

Formation, structure and evolution of stars

Fourier decomposition of the light curves of high amplitude δ Scuti and SX Phe stars
Antonello, E., Broglia, P., Conconi, P., Mantegazza, L. 122

The evolutionary history of Hercules X-1
Sutantyo, W., van der Linden, T.J., van den Heuvel, E.P.J. 133

Precataclysmic binaries
Ritter, H. 139

Structural properties of the light curves of *s*-Cepheids
Antonello, E., Poretti, E. 149

The ultraviolet variability of the symbiotic star HBV 475. III. The periodicity of HBV 475
Nussbaumer, H., Schmutz, W., Vogel, M. 154

Is it possible to maintain magnetic fields in the radiative cores of rotating stars with convective envelopes?
Hinata, S. 161

73 Virginis: a new δ Scuti variable
Sterken, C., Jerzykiewicz, M. 164

The variability of Spica
Sterken, C., Jerzykiewicz, M., Manfroid, J. 166

The stability of differentially rotating self-gravitating gas clouds. I. An approximation method and its application to isothermal configurations
Schmitz, F. 171

A two-component model for the corona of λ Andromedae
Mewe, R., Schrijver, C.J. 178

Trapped non-radial oscillation modes in Wolf-Rayet models
Scuflaire, R., Noels, A. 185

Late stages of stellar evolution. III. The observed evolution of central stars of planetary nebulae
Schönberner, D. 189

The "Bright Stars" with *UBV*-colors close to those of the Sun
Neckel, H. 194

Stellar atmospheres

The [O/Fe] ratio in metal-poor late-type stars
Gratton, R.G., Ortolani, S. 201

The metal abundance of metal-rich globular clusters. II
Gratton, R.G., Quarta, M.L., Ortolani, S. 208

Analysis of Ca II emission lines in seven RS CVn systems
Fernández-Figueroa, M.J., Montesinos, B., de Castro, E., Rego, M., Giménez, A., Reglero, V. 219

Mass loss from central stars of planetary nebulae: the nucleus of NGC 6543
Bianchi, L., Cerrato, S., Grewing, M. 227

The Mg II emission in a sample of regular-period RS CVn systems
Fernández-Figueroa, M.J., Sedano, J.L., de Castro, E. 237

NLTE-analysis of the sdO star ROB 162 in the globular cluster NGC 6397
Heber, U., Kudritzki, R.P. 244

Temporal polarization variations of Be stars. I. Models based on stochastic behaviour
Clarke, D., McGale, P.A. 251

Two-photon emission in X-ray pulsars. Models of the phase-dependent spectra and the pulse-shapes
Kirk, J.G., Nagel, W., Storey, M.C. 259

Diffuse matter in space (including H II regions and planetary nebulae)

Dust matter in the W 3 molecular cloud complex
Kolesnik, L.N. 268

Torsionally excited methanol in hot molecular cloud cores
Menten, K.M., Walmsley, C.M., Henkel, C., Wilson, T.L., Snyder, L.E., Hollis, J.M., Lovas, F.J. 271

^{13}CO and ^{12}CO observations of cold IRAS unidentified point sources in the Galaxy
Casoli, F., Dupraz, C., Gerin, M., Combes, F., Boulanger, F. 281

Elastic collisions of solar wind protons with interstellar neutrals (H and He) inside the heliosphere: a new approach
Chassefière, E., Bertaux, J.L., Sidis, V. 298

(RN) An analytical solution for the infrared emission from interstellar grains heated by supernovae
Pearce, G. 380

The Sun

Polarization of white-light corona under hydrostatic density distribution
Badalyan, O.G. 305

The global oscillation spectrum of the Sun. I. Analysis of daily power spectra of velocity measurements
Pallé, P.L., Pérez, J.C., Régulo, C., Roca Cortés, T., Isaak, G.R., McLeod, C.P., van der Raay, H.B. 313

Relative emission line strengths for the sodium-like ions Al III and Si IV in the Sun
Keenan, F.P., Dufton, P.L., Kingston, A.E. 319

The solar granulation. II. Photographic and photoelectric analysis of photospheric intensity fluctuations at the mesogranulation scale
Koutchmy, S., Lebecq, C. 323

Observations concerning the generation and propagation of Type III solar bursts
Kellogg, P.J. 329

The solar system

Photometry and activity of the nucleus of P/Halley at heliocentric distances larger than 4.6 AU, pre-perihelion
Festou, M.C., Lecacheux, J., Kohl, J.L., Encrenaz, T., Baudrand, J., Combes, M., Despiau, R., Laques, P., Le fèvre, O., Lemonnier, J.P., Lelièvre, G., Mathez, G., Pierre, M., Vidal, J.L. 336

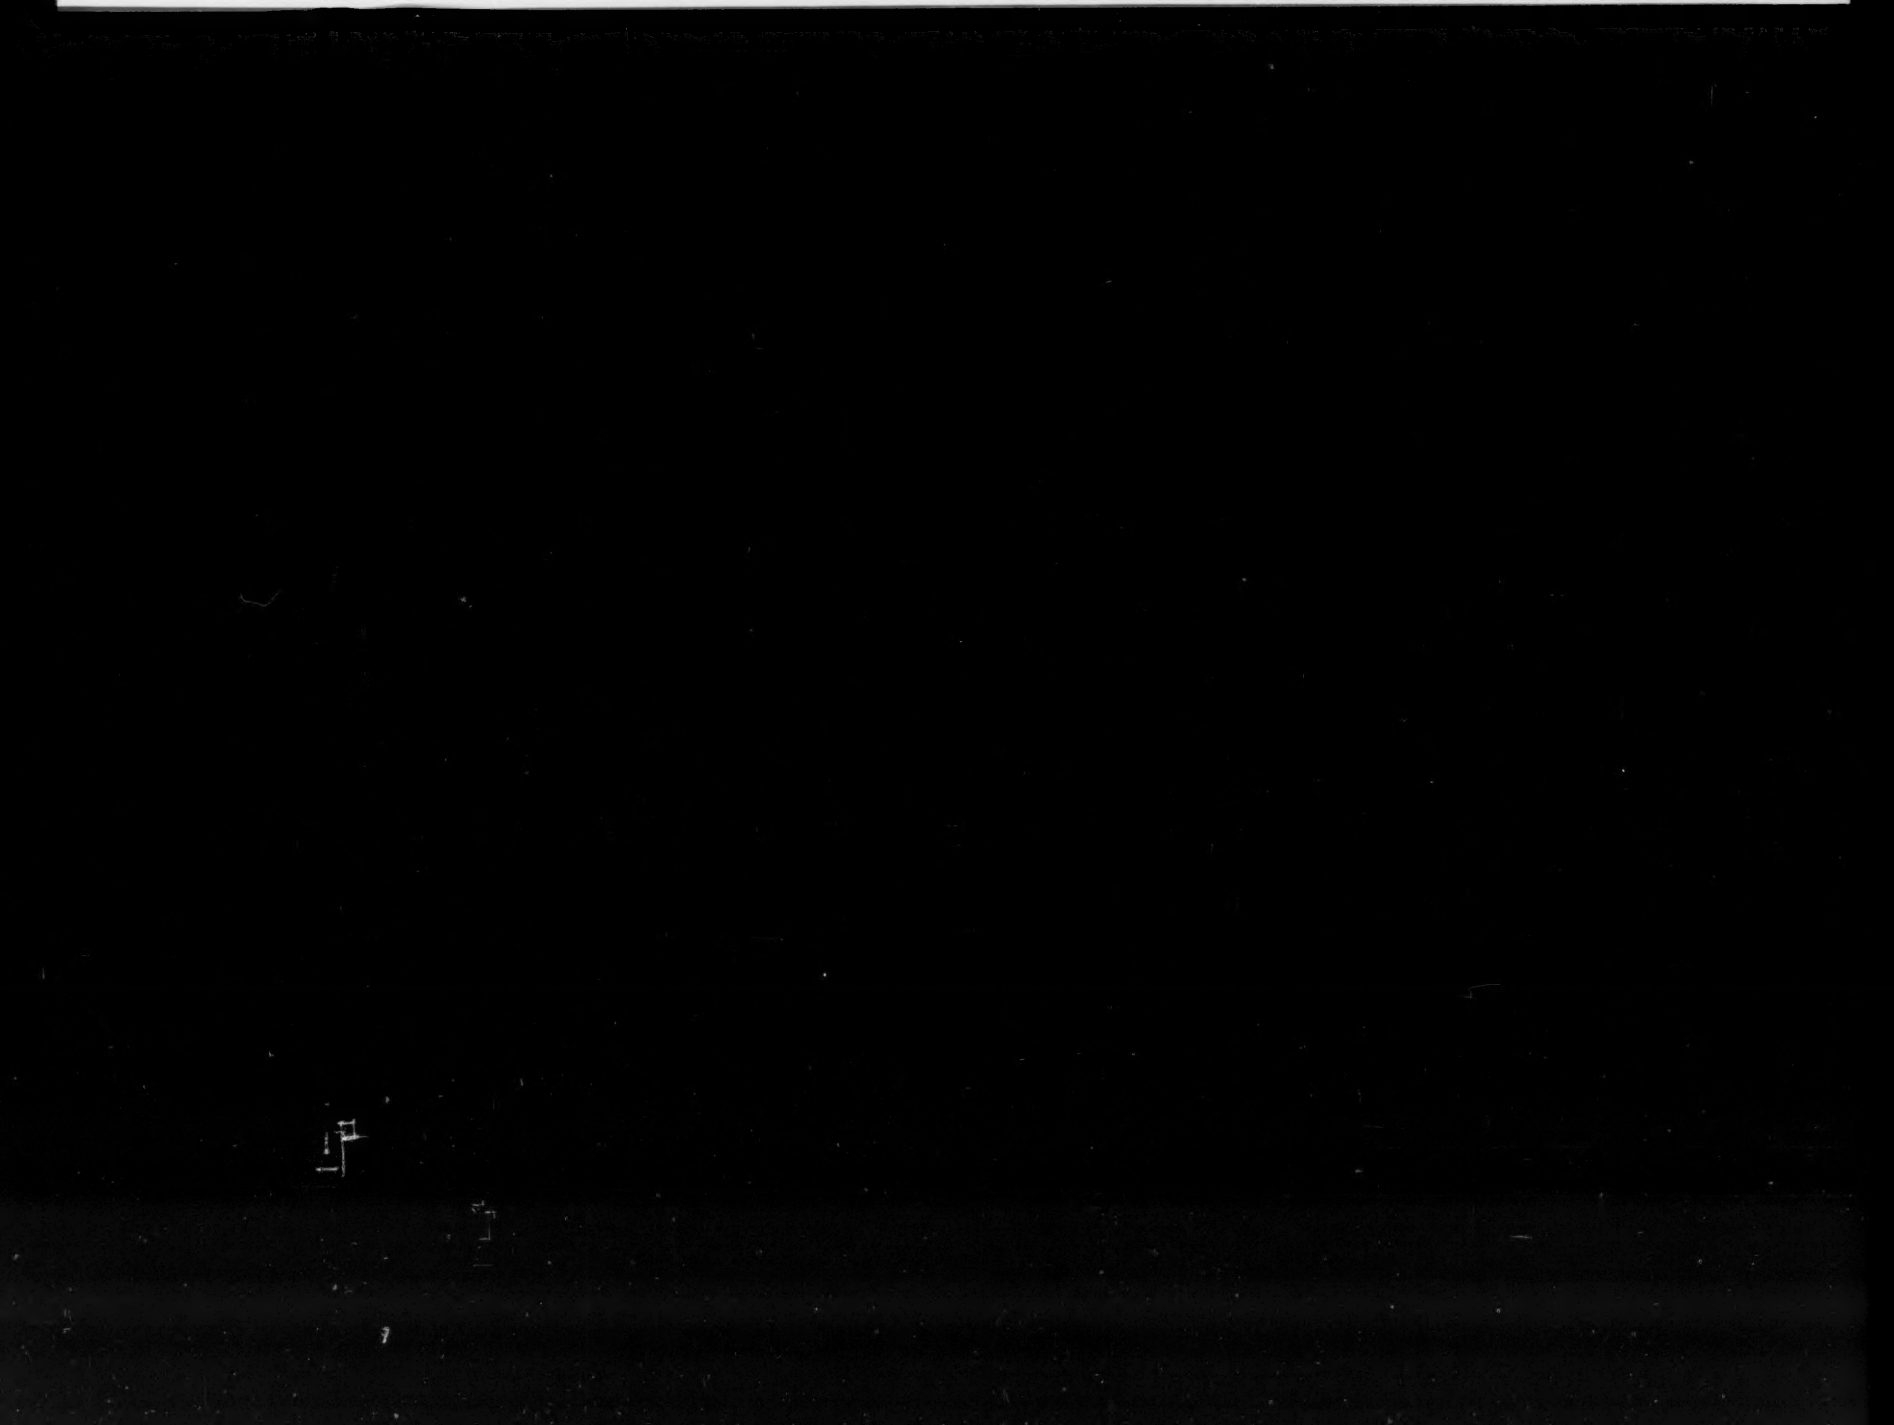
The origin of S-bursts in Jupiter's decametric radio spectra
Zaitsev, V.V., Zlotnik, E.Y., Shaposhnikov, V.E. 345

Celestial mechanics and astrometry

Stability of resonant orbits in planetary systems with spheroidal star
Ichtiaroglou, S., Katopodis, K., Michalodimitrakis, M. 355

An analysis of occultation observations of the Galilean satellites of Jupiter and comparison with theories
Fairhead, L., Arlot, J.-E., Thuillot, W. 360

Annual and diurnal variations of the graduation error of a photoelectric meridian circle
Miyamoto, M., Suzuki, S., Hara, H., Kuwabara, T. 367

Physical and chemical processes


The implications of ultra-high-energy activity in X-ray binary systems
Mastichiadis, A. 373
